

Nursery Photograph Policies and Procedures – specific to children

Photographs

All children attending Sunnybank, will at some point be photographed by the staff. This will only be done for the recording of Nursery activities and events and only carried out with permission from the parents.

Photographs may be displayed in areas throughout the Nursery premises and parents must be made aware of this when completing the permissions form.

There will also be two official photograph days per year, where a professional photographer will be contracted by the Nursery, to take portrait photographs of the children. Permission for this will be sought from the parents beforehand.

Regarding photographs on the nurseries website, a separate permission form is completed by the parents when they start the nursery. This permission form states the parents' wishes regarding uploading of photographs onto the website.

Please also see the nurseries Mobile Phone Policy for Camera use.
